CONDITIONS OF SALE

Prices are for quantity as stated. Smaller or less quantities than priced will be quoted on application. Please send remittance with order for, except where stated, **Orders of \$1. or more, PREPAID.**

SUBSTITUTION: Should certain varieties or colors become exhausted, we will send others as near or better, unless advised to contrary, using our best judgment on what will do best in your locality.

DO NOT BECOME ALARMED if plants are not received by return mail. You will receive acknowledgment and order number, and will get plants within a reasonable time.

NON-WARRANTY: We wish it to be distinctly understood that while we take every precaution to have all plants, seeds, and bulbs true to name, we give no warranty, express or implied, as to description, quality, productiveness, or any other matter, of any of the plants, seeds, or bulbs we send out, and will not in any way be responsible for the crop. Every order we receive will be executed on these conditions only, and they must be accepted by the customer when ordering.

YUCCA—Adams Needle and Thread.

**Filamentosa Monstrosa*. Evergreen foliage.

‘‘ W E A V E R ’ S ’ ’ HARDY CHRYSANTHEMUMS

In our ever increasing list of out-door “mums,” we have a complete collection of the best and most popular tested and proven named varieties for garden and outdoor blooming.

Hardy “mums” are liked by all. They produce a wonderful display of blooms long after most flowers are gone. The many colored flowers, long graceful stems are unexcelled for bouquets, table and other decorations, often lasting for weeks after cutting under favorable conditions.

Each “Group” covers a flowering period from late August until November—the latter kinds bloom beautifully even after freezing. Lifted from the garden or border in late fall, and potted, make excellent showy lasting plants for all purposes. Late varieties remain good until Christmas.

To insure complete and prompt delivery, orders should be placed as early as possible.

TERMS: Remittance with order as we Deliver Anywhere Prepaid.

The finest flowers are grown from the size plants we supply as priced in each group. Often early in season, large field clumps are available as priced.

CULTURAL DIRECTIONS FOR CHRYSANTHEMUMS:

When to Plant. Soon as ground can be worked in spring after danger of freezing is over, even up to June 20th, will give good blooming plants in fall.

How to Plant. Dig ground deep, most any kind of soil that will grow anything else will grow Mums. Work in some good rotted manure or fertilizer if available, if fed well, plants will be strong, flowers larger. Have soil loose and mellow, set plants like you would cabbage and tomatoes, spacing them 12 to 15 ins. apart. Press moist soil firmly around roots. Cultivate often, keep grass and weeds out.

Stopping or Shaping Plants. To prevent straggly spindly growth and secure more bushy and rounded type plants, when 8 in. high cut back to 6 ins. When new shoots are 4 ins. long, pinch out the terminal bud, this tends to produce desirable stocky type plants.

Disbudding. Treat as above, but only allow one flower bud on each stem and that a terminal bud, keep all side buds pinched out. While do not approve this method, it produces larger individual flowers.

NOTE:

† Marked are 24-36". Tall, branchy, very prolific.

‡ Marked are 24-36". Tall, erect, stout stemmed.

|| Marked are 15-20". Dwarf, compact, good potted.

* Marked are 15-20". Dwarf, branchy, O.K. potted.

§ Marked are 10-12". Very dwarf, compact, trailing. Good potted; for rockeries and borders.

Aug., Sept., Oct., Nov.—Blooming time.
